6/21/2019

Butler County Storm Water District

A call has been placed to the district requesting an assessment of the Storm Drainage System located behind the homes on Pond Ridge Circle, adjoining portions of Stirrup Court and the Cul de Sac of Horse Trail Court.

No definite date was given other than “if you don’t see the workmen within a week and a half, call back.”. I will follow up on this within that timeframe.

The workmen and any equipment needed will access the system at the property easement at 1130 Pond Ridge Circle. The equipment will be parked in this general area.

The children in our neighborhood find the cement drainage stations very interesting. Please advise your children to stay away from the work areas and the concrete stations located behind the houses. The main station is behind my house at 1130 Pond Ridge Circle and the children are always climbing on it.

Any questions, please feel free to contact me by texting to 513-508-0076 or REHOA.Treasurer.2018@gmail.com
